

VANESSENTIAL

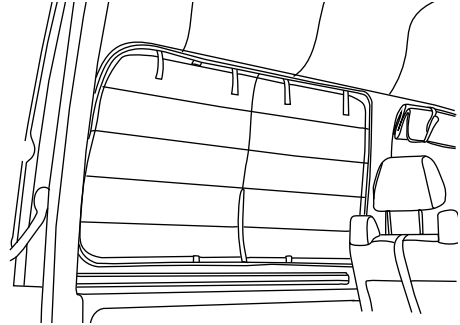

WINDOW COVERS

Installation:

Window covers arrive stiff but will soften after a few uses - they're ready to be used right away!

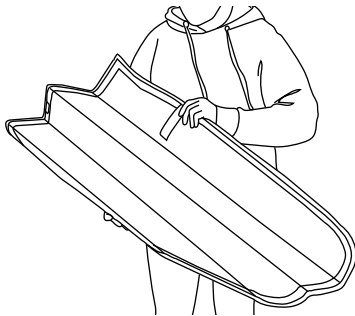

When putting your window cover in place, orient the cover so that the black fabric faces the outside and the straps are on the top of the cover (excluding front window covers). Window covers are designed to be oversized and pressed into place.

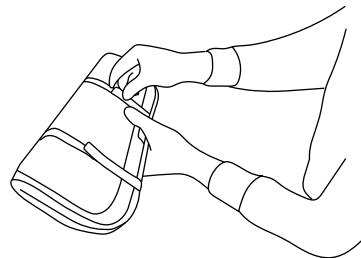

Storage:

All window covers use an accordion style fold for storage. Be sure to pay attention to how the window cover is folded when it arrives for correct storage use.

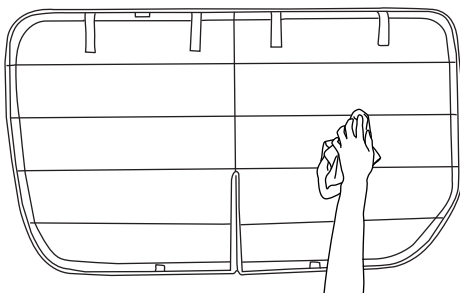

Use black velcro straps to keep the window cover packed flat and the included bag for an extra layer of protection during storage.

Cleaning/Care:

Dirt and stains are easily removed from our window covers with warm soapy water and a cloth.

Window covers are not designed to stay in windows at all times. We recommend installing window covers in place for privacy and comfort whenever needed throughout the day and folding and storing in place when not in use.
