

# VANESSENTIAL

## INSULATED PRIVACY CURTAIN

### Installation:

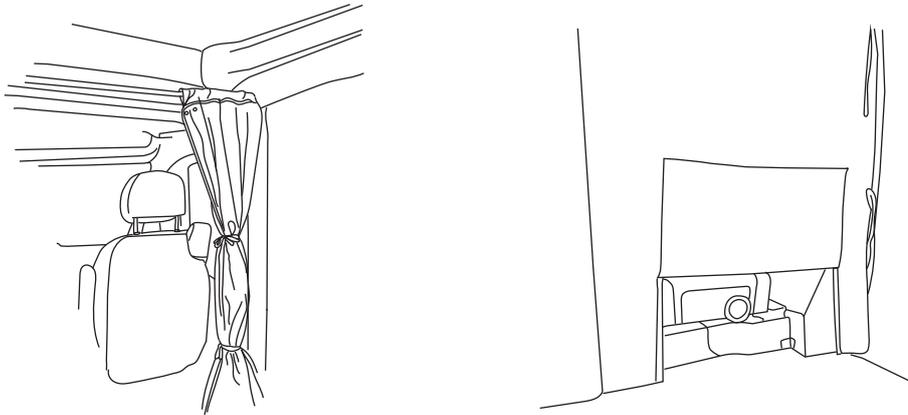

Slide both halves of your privacy curtain onto the rail, then secure the rail into place. Ensure that the magnetic doors meet in the center of your van and that the VanEssential logo faces the back of your vehicle.

### Use:

For privacy, close your curtain using the magnetic doors. When not in use, secure the curtain on either side with the built-in ties.

If your van heater is located under your passenger seat, when using the heater, fold up the flap and secure it open with the magnetic closure. Warning: Make sure the curtain does not block the heater's airflow while in use.

### Cleaning and Care:

Use warm soapy water and a cloth to remove any dirt or stains from the privacy curtain. Do not machine wash. Air dry only.
